Counseling Special Populations in Schools-Emily S. Fisher 2016-12-05 Counseling Special Populations in Schools provides school-based mental health professionals with practical, specific strategies for counseling special populations of students who are at risk for academic, social, emotional, and behavioral problems in school.

These special populations include students who are homeless, living in foster care, involved with the juvenile justice system, LGBTQ, pregnant or parenting, gifted, in need of services from special education, or at risk for school failure and dropout, and impacted by incarcerated parents. Expert contributors provide background information and provide evidence-informed counseling approaches and strategies to promote resilience and support student development.

Chapters provide specific information about how to use basic counseling skills, as well as more advanced counseling techniques such as Solution-Focused Brief Therapy, Cognitive Behavioral Therapy, and Motivational Interviewing, to address the needs and challenges of these special populations of students. This advanced-level counseling book is an excellent resource for mental health professionals and graduate students who want to be able to provide effective counseling services for all students.

**Visual Diagnosis and Care of the Patient with Special Needs**

Tash 2012 Visual Diagnosis and Care of the Patient with Special Needs provides a thorough review of the eye and vision care needs of patients with special needs. This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office. These disabilities include patients with autism, brain injury, Fragile X syndrome and Down syndrome, as well as those with psychiatric illness, dual diagnosis, and more. The text discusses, in great detail, the visual issues inherent in these populations and their possible treatment. A group of authors with approximately 50 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference. It may appear that this book is written primarily for eye care practitioners such as optometrists and ophthalmologists, while vision is the overriding topic, this book serves as an excellent resource for a multitude of professionals including those engaged in occupational therapy, physical therapy, speech and language therapy, physiotherapy, social work, pediatric medicine, and special education.

**Special Aging Populations and Systems Linkages**

M. Joanna Moller 1996 Special Aging Populations and Systems Linkages educates professionals working in geriatric settings about the barriers and issues of several emerging special groups within today’s aging population. It gives readers examples, guidelines, and a thorough overview on developing successful linkages between aging and non-aging service systems to meet the service needs of these special populations. By exploring the challenges and barriers facing by service systems attempting to work together, Special Aging Populations and Systems Linkages provides a blueprint to those working with cross-system interest groups, task forces, and councils. The book informs readers of the epidemiology, issues, and concerns of some specific populations of older persons including: persons with developmental disabilities alcohol and substance abusers cancer patients persons with HIV/AIDS the abused elderly older caregivers Chapters in this timely book provide treatment experiences with these special populations and with linking systems as case histories for the professional. These case histories help social workers understand the needs of special older people with whom they work and facilitate negotiations among service systems and agencies so that older people facing special challenges secure the help they and their families need. Special Aging Populations and Systems Linkages answers the absolute imperative for social workers and other geriatric professionals to understand the subpopulations which make up the 65 plus cohort in the U.S. and fosters creative thinking about service organization and practice issues generated by the diversity of this population. Students at all levels of gerontology programs; staff in the aging network (service personnel), administrators, and senior center directors; community service personnel; staff of Area Agencies on Aging; social workers in geriatric health care settings; public health educators; and social workers in service agencies of the special populations—mental retardation/developmental disabilities, cancer care, HIV/AIDS, substance abuse, adult protective services, child welfare—can refer to Special Aging Populations and Systems Linkages for insight time and again as they strive to meet the diverse needs of the entire aging population.
